

Automate Cash Grain Marketing

You Don't Need a Futures Account to Get a Managed Account

Grain Market Max is a cash grain managed account. That's right. Now you can have someone manage HTA's and Basis contracts without a Hedge Account. You allocate your grain to this program and we execute trades on your behalf. You don't miss opportunities to pull the trigger because you were out in the field or emotionally attached. By using a cash grain program we can help you achieve higher prices, lower risk and simplify decisions. You don't need a futures account or cash sitting in a brokerage account. Since you don't need this, you get the benefit of selling futures and negotiating basis separately which improves cash grain prices and ultimately your bottom line!

How it works:

You sign up bushels in the program and we secure best prices for them.

Step 1: Register for GrainBridge for FREE. We can help you get registered or simply do it online yourself. We are an Approved Grain Bridge Dealer!

Step 2: Complete limited POA for grain marketing. If you don't want a managed account you can use GrainBridge yourself and contact us only when you have questions!

Step 3: Complete your budget using Planner. Or, talk to one of us about complete financial analysis and benchmarking. This step will allow you to view profit and loss on a daily basis for your farm using CBOT closing prices!

Step 4: Tell us who you are willing to sell to. Trucking costs? Favorite delivery points? We'll work with them.

Step 5: Chose your marketing plan and we'll make sell offers on your behalf throughout the year. We'll work with your plan to manage risks and achieve best prices for both futures AND cash!

Step 6: Then watch your daily profit and loss statement! Deliver your grain and collect your profit!

How to use it:

Scenario 1: DIY. Sign up for GrainBridge and we'll be your dealer. If you have questions we'll help you.

Scenario 2: Sign up certain number of bushels. Put us up against your own marketing plan and see how we perform. We are professional trigger pullers, landing you in top third. With enough bushels we'll also push basis for you!

Scenario 3: Sign up the whole farm. We get a more thorough perspective on your risk and profit scenarios by viewing all of your farm. Different than grain elevator managed accounts because we are independent. We're not buying your grain, we're not selling you products. This is an advisor that is getting his hands dirty for you.

Benefits of Grain Market MAX:

- **Get the trigger pulled.** See a daily p&l statement for you farm.
- **Consolidate all your positions...** what is my average price today?
- **Discover better basis via text, email, voicemail...** and have us react for you.
- **Communicate with your grain buyers by offer to sell grain via electronic platform.**
